

WHAT WE DO

REVU Consultancy LLP helps chemical companies **improve efficiency, increase productivity and grow revenue**. A group of skilled experts diagnose problems and deliver comprehensive solutions tailored to each company's unique challenges — rapidly scaling and accelerating chemical companies' value and performance.

HOW WE WORK

1 Feasibility & Research

Assess potential, run product-literature and process studies to project yield & quality.

2 Design & Engineering

P&I diagrams, process flow, plant layouts and utility requirements.

3 Execution

Material balance, batch cycle time, SOPs and analytical specifications per project.

4 Expert Oversight

Leaders with years of corporate chemical-industry experience manage every step.

OUR SERVICES

Process Development through Research & Development Activities

Analytical Support with Two GC & Two HPLC Systems

Establishment of Analytical Methods for In-Process & Final Products

NABL Accredited Environmental Testing Laboratory

Environmental Management Systems — STPs & ETPs of All Sizes

De-bottlenecking of Existing Process & Process Optimization

CIB & RC Registration for Agrochemicals under Insecticide Act, 1968

Basic Engineering & Detail Engineering

GPCB Approved Schedule-II Auditor, Gandhinagar

Expertise in Solid Waste Management

Commercialization of Project to Largest Stage

Liaisoning with Government Agencies (GPCB, CPCB, MoEF & CC, CIB)

Pre-Commissioning & Post-Commissioning Activities & Plant Trials

R&D Lab with PhD & Master's-level Technocrats (7–8 Scientists)

Regulatory Affairs — MoEF & CC, GPCB, CPCB (New Delhi)
